

2011
Drug Formulary

Current formulary available at www.ufcaz.com

Contract services are funded in part under contract with the State of Arizona.

The University Family Care drug formulary is subject to change, please visit our website at www.ufcaz.com or call our Member Services Department at 1-800-582-8686 for the most up to date formulary.

To search the University Family Care (UFC) Drug Formulary for a specific drug online, please follow the steps below:

Step 1. Enter the name of the drug in the “Search” box. Push the “Enter” button on your keyboard (Note: If you do not see the “search box” hold down the “Control key” and the letter “F” key at the same time).

\$\$	sulindac *	(GEN FOR CLINORIL)	X

Step 2. Your drug will be highlighted as the 1st listing of the drug searched. (To perform new search, repeat step 1.)

What if my drug is not found in the Drug Formulary?

If your drug is not included in this list of covered drugs, you should first contact Member Services and confirm if your drug is covered. This document includes only a partial list of covered drugs, so University Family Care may cover your drug.

If your drug is not listed in the Drug Formulary, you can ask your doctor to submit a prior authorization to UFC. For example, for certain drugs, UFC limits the amount of the drug that we will cover. If your drug has a quantity limit, you can ask us to waive the limit and cover more.

Generally, UFC will only approve your request for an exception if the alternate drug(s) included on the plan's formulary, or additional use restrictions would not be as effective in treating your condition and/or would cause you to have adverse medical effects.

University Family Care

The Drug Formulary

The drug formulary is a list of medications covered by University Family Care. It is intended for use by the plan, providers, and pharmacies. The formulary applies only to outpatient prescription medications. It does not apply to inpatient medications obtained from or administered by a physician.

The drug formulary is a generically run formulary. Medications listed on the formulary followed by an asterisk (*) must be dispensed with the generic product. The brand names are listed for all drugs for references purposes only. For medications without an asterisk, the generic must be dispensed if it becomes available. Medications followed by NTI are narrow therapeutic index medications and either generic or brand may be dispensed.

The University Family Care drug formulary is subject to change and may not be reflected in the printed or on-line drug formulary.

Prior Authorization

Prior authorizations are required where designated [PAR]. Medications not listed in the drug formulary are not covered unless prior authorization has been obtained from University Physicians Health Plans. Please fax prior authorization requests to (866)349-0338. PAR forms are available on the web at http://www.ufcaz.com/WebsiteMedia/Docs/UPHP_So_AZ_PriorAuth_form.pdf

Step Therapy

The drug formulary has certain medications listed as step therapy [ST]. If a medication is listed as (ST), members are required to try a formulary medication before requesting the step therapy medication. If these steps are not followed, the provider must request a prior authorization before the member is allowed to receive the prescribed medication. PAR forms are available on the web at http://www.ufcaz.com/WebsiteMedia/Docs/UPHP_So_AZ_PriorAuth_form.pdf

Quantity Limits

Certain medications have quantity limitations to encourage appropriate utilization. Quantity limits are based on clinically approved prescribing guidelines to ensure safe and proper use of medications. Drugs that have established quantity limits are identified by the symbol [QLL].

Dollar Sign Designation

The dollar signs next to the drug names indicate the relative cost of the drugs listed for that class. The greater the number of dollar signs, the more expensive the medication.
